## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, SQL, HTML, CSS  
**Frameworks & Libraries:** Next.js, React, Express.js, Node.js, Tailwind CSS  
**Developer Tools:** Git, GitHub, Figma, REST APIs, Vercel  
**Databases:** MySQL, MongoDB, PostgreSQL

## EDUCATION

---

|                                                                                                                                     |                                 |
|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Sri Venkateshwara College of Engineering</b><br><i>Bachelor of Engineering – Information Science and Engineering   CGPA: 8.1</i> | Bengaluru, India<br>2022 – 2026 |
| <b>Sri Sathya Sai Loka Seva P.U. College</b><br><i>XII – State Board   88.8%</i>                                                    | Alike<br>2020 – 2022            |

## EXPERIENCE

---

|                                                                     |                                   |
|---------------------------------------------------------------------|-----------------------------------|
| <b>Python &amp; Full Stack Developer Intern</b><br><i>Contriver</i> | Bengaluru, India (Hybrid)<br>2026 |
|---------------------------------------------------------------------|-----------------------------------|

- Developed 3+ full-stack web applications using React, Node.js, and REST APIs, reducing average page load time by 30%.
- Designed and delivered 5+ responsive frontend interfaces, improving cross-device compatibility and user engagement.
- Developed an anti-fraud detection model using Python and XGBoost, applying classification algorithms to identify and flag suspicious transactions with high accuracy.
- Collaborated on debugging and performance optimization, resolving 10+ critical bugs and improving application stability across the stack.

## PROJECTS

---

**DevEvents – Event Management Platform** | *Next.js, TypeScript, MongoDB, Tailwind CSS* | [Website](#) | [GitHub](#)

- Built a full-stack event management web app using Next.js (App Router), TypeScript, and MongoDB, deployed on Vercel.
- Implemented dynamic event creation, listing, and booking workflows with server-side rendering and optimized API routes.
- Designed a responsive, component-based UI with Tailwind CSS for seamless experience across devices.
- Integrated MongoDB for persistent event and user data storage with efficient schema design.

**Subscription Tracker – Backend Application** | *Node.js, Express.js, MongoDB, Arcjet, Upstash* | [GitHub](#)

- Built a scalable RESTful backend with Express.js to manage end-to-end subscription lifecycle workflows.
- Architected and optimized MongoDB schemas and API routes for efficient, maintainable data handling at scale.
- Automated email reminder notifications using NodeMailer to improve user retention and engagement.
- Hardened application security using Arcjet for rate limiting, bot protection, and request validation.
- Leveraged Upstash Redis for caching and performance optimization in a serverless deployment environment.

**Multimodal AI Chatbot** | *Python, Phi-3, LLaVA, Ollama, DeepFace* | [GitHub](#)

- Built a privacy-first multimodal AI assistant using Phi-3 for text and LLaVA for image understanding, both run locally via Ollama.
- Integrated DeepFace for on-device face recognition and verification against a stored registry without external data transmission.
- Implemented a syllabus-aware chatbot that answers course-related questions by querying a structured JSON knowledge base.

**Movie Recommendation System** | *Python, Scikit-learn, TMDB API, Streamlit* | [GitHub](#) | [Website](#)

- Developed an AI-powered movie recommendation engine using content-based and collaborative filtering on TMDB datasets.
- Integrated the TMDB API to dynamically fetch movie posters, cast details, and ratings for richer recommendations.
- Deployed an interactive Streamlit web application enabling users to receive personalized movie suggestions in real time.

**Personalized Learning Path Generator** | *React, Next.js, Tailwind CSS, Recharts, PostgreSQL* | [Website](#) | [GitHub](#) | [Figma](#)

- Built and styled the entire UI using Next.js and Tailwind CSS, including the course creation wizard, chapter learning environment, and interactive quiz interface.
- Developed reusable React components for dynamic rendering of AI-generated Markdown content and multiple-choice quiz assessments.
- Integrated Recharts to build an interactive analytics dashboard displaying user progress, quiz scores, and course completion rates.
- Implemented responsive layouts and seamless page routing using Next.js App Router for a smooth single-app learning experience.
