EDUCATION

- Information Science and Engineering | Sri Venkateshwara college of Engineering CGPA: 8.1| (2026)
- XII (STATE) | Sri Sathya Sai Loka Seva P.U. College, ALIKE 88.8%| 2022
- X(STATE) | The Crescent School 95.33%| 2020

SKILLS

- HTML,CSS,JavaScript,Python,React,Next JS,Express JS,Tailwind CSS
- Power BI,MySQL,Figma,Git,GitHub,MongoDB

PROJECTS

- **AMAZON CLONE**|[LINK](#)
 - Built an Amazon-like shopping website using HTML, CSS, and JavaScript.
 - Added products with images, price, and details.
 - Implemented Add to Cart feature.
 - Displayed selected items in cart icon.
 - Created checkout page to review and place orders.
- **MULTIMODEL CHATBOT**|[LINK](#)
 - The software uses Phi-3 to handle text besides LLaVA to examine pictures. Both run on Ollama.
 - DeepFace manages face recognition without sending data outside and compares faces with those stored in a registry.
 - A chatbot answers questions about the syllabus plus course - looking up a JSON file.
 - Users send text or images and receive a response.
- **MOVIE RECOMMENDATION SYSTEM** |[LINK](#)
 - Developed a movie recommendation system using TMDB datasets.
 - Implemented content-based and collaborative filtering to suggest movies.
 - Integrated TMDB API to fetch posters, cast, and ratings for better recommendations.
 - Built an interactive web app for users to get personalized movie suggestions.
- **SUBSCRIPTION TRACKER (Backend Application)**|[LINK](#)
 - Built a scalable backend system using Express.js to manage subscription workflows.
 - Architected and optimized MongoDB schemas and API routes for efficient data handling.
 - Automated email notifications using NodeMailer to improve user engagement.
 - Enhanced application security using Arcjet for rate limiting and protection.
 - Leveraged Upstash for caching and performance optimization in a serverless environment.
